DATE MAILED: 07/23/2002

Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: d

Claims 77-105 are allowable over the prior art because the prior art does not disclose or suggest the combination of the following steps: exciting at a low power a physical system with a wide band excitation input signal; interconnecting spatially distributed data recorders/processors to an acquisition control computer using a telemetry network; simultaneously receiving and recording the wide band excitation input signal in the data recorders/processors; and using a stochastic process to derive from the recorded wide band excitation input signals a system transfer function for the physical system over the width of the wide band excitation input signal.

Claims 106-108 are allowable over the prior art because the prior art does not disclose or suggest the combination of the following steps: exciting at a low power a system with wide band excitation signals; interconnecting distributed data recorders/processors to an acquisition control computer using a telemetry network; simultaneously receiving and recording the wide band excitation input signals and a frequency synchronization signal in the data recorders/processors at each location; sending the recorded wide band excitation input signals and the frequency synchronization signal to the acquisition control computer via the telemetry network and analyzing the recorded wide band excitation input signals using stochastic processing techniques to estimate the system transfer function.

Claims 109-119 are allowable over the prior art because the prior art does not disclose or suggest the combination of the following features: a waveform synthesizer for generating a synthesized low-power, wide band waveform signal and exciting a physical system with the synthesized low-power, wide band waveform signal; and a controller means for simultaneously commanding the waveform synthesizer to broadcast the synthesized low-power, wide band waveform signal to excite the physical system and to send a synchronization signal through a network arrangement to cause a first data recorder/processor to sample the synthesized low-power, wide band waveform signal, to cause second and third data recorders/processors to measure and record the signals received in the physical system from the low-power, wide band input signal, and to cause the first, second and third data recorders/processors to send the measured and recorded signals in digital format in synchronized form through the network arrangement to an acquisition control computer for later processing to compute a transfer function of the physical system.

Claims 120-123 are allowable over the prior art because the prior art does not disclose or suggest the combination of the following steps: exciting at a low power a physical system with a wide band excitation input signal; interconnecting spatially distributed data recorders/processors to an acquisition control computer using a telemetry network; simultaneously receiving and recording the wide band excitation input signal in the data recorders/processor at each spatially distributed location; sending the recorded wide band excitation input signals to the acquisition control computer via the telemetry network and using a stochastic process to derive from the

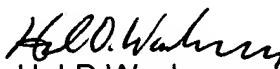

recorded signals a system transfer function for the physical system over the width of the wide band excitation signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hal D Wachsman whose telephone number is 703-305-9788. The examiner can normally be reached on Monday to Friday 7:00 A.M. to 4:30 P.M..
